

STRATEGICS PITCH NIGHT

Wednesday, August 16, 2023

4-7 pm

Innovation Campus of Burlington MA

Presenting & Showcasing

BrilliantStrings Therapeutics: complete human collagen biomaterial and platform that makes a quantum leap forward in affecting complete and rapid healing. (www.brilliantstringsthx.com)

CranioSense: proprietary portable, objective and accurate near-infrared-based device that diagnoses intracranial hypertension without the need for invasive actions. (www.craniosense.com)

DeepCharge: AI-enabled intelligent surfaces technology, designed to transform any pad and surface into a contactless multi-device wireless charger. (www.deepcharge.io)

Election Bridge: civic network platform that empowers organizations to reshape their interaction with local government and revolutionize member-driven civic engagement for greater community impact. (www.electionbridge.com)

Fourier: revolutionizing the thermoforming process through MVP (a ceramic matrix composite) that allows thin-sheet ceramics to be molded into complex 3D thermal management devices. (www.fouriercmc.com)

GelSight: lab-grade, non-destructive, 3D-surface (submicron-level) analysis in the palm of one's hand. (www.gelsight.com)

Genomic Expression: analyzing RNA to monitor health, detect disease and design next generation cures: individualized RNA therapeutics. (www.genomicexpression.com)

GiwoTech: developing digital twin of viruses by stimulating 3D structure and function through revolutionary AI and MD to disrupt viruses. (www.giwotech.com)

Intelon Optics : the Brillouin Optical Scanner System (BOSS) enables non-invasive, next generation point-by-point biomechanical imaging of living tissue and cell structures in eye care and fertility. (www.intelon.com)

>cont'd

Presenting & Showcasing (cont'd)

Magnomer: reducing plastic pollution, and enabling zero-waste environment through the use of magnetizable inks on plastic packaging. (www.magnomer.com)

OrthoKinetic Track: AI-based wearable device for tracking joint kinematics and muscle activity of post-op patients with joint disorders or injuries. (www.orthokintrack.com)

PhagePro: bacteriophage-based products to kill bacteria, prevent infections and also help the world's most vulnerable communities. (www.phageproinc.com)

Planck Energies: advanced, recyclable materials, providing 24-hour passive radiative cooling for buildings that significantly lowers energy requirements and expenses. (www.planckenergies.com)

Predictive Healthcare: AI-based postoperative surgical site infection monitoring technology that assesses wound health, patient inputs, and vital signs to predict surgical site infection risk. (www.predictivehealthcare.ai)

RT MicroDX: the first over-the-counter molecular test for strep that can be administered from the comfort of one's home. (www.rtmicrodx.com)

RubixLX: connecting and powering the world's healthcare data through diversity patient analytics and facilitating clinical research delivery to overcome health and disease disparities. (www.rubixls.com)

Salutemp: temperature-sensing device provides patients with drug facts and alerts, enabling them to safely store and use their medications. (www.salutemp.org)

THANK YOU SPONSORS
